In rare instances where returns were < 10% extending the time frame by 1-2 years helps.

Source: Ace MF, FundsIndia Research. How to read the table: Column 1 indicates the starting date of investment. The Row named 'Year' indicates the time frame on investment – 1Y, 2Y, 3Y etc. For eg: If you had invested in Jan-03, then over a 3Y time frame your annualized return would have been 40%, etc.

In rare instances where 7 year returns were < 10% extending the time frame by few years helped to recover performance
